

Shared Planet Solutions

Simple - Affordable - Sustainable™

Overview

A Semper Technology, Inc. Division

Who we are

In addition to a passion for providing high-quality information technology solutions, Semper Technology, Inc. also has a passion for the environment.

The mission of the *Shared Planet Solutions* Division is to make it as easy and affordable as possible for individuals, families, organizations, and governments to reduce their environmental impact on our shared planet in areas that have a great impact, but are often overlooked.

What we do

We provide a functional and affordable assortment of environmentally-friendly products and services along with practical information and advice to minimize your environmental impact while maximizing your benefits.

Our Products:

- **Reusable Drinkware and support equipment**

Why?

- ◆ Over 740 million gallons of oil are wasted each year in the U.S. in producing bottled water alone.
- ◆ Bottled water and other disposable bottles and cups are major contributors to our growing litter problem.
- ◆ Less than 23% of bottled water is recycled.
- ◆ While much better than forever in a landfill, recycling consumes energy and resources, and should be the last resort.
- ◆ The great news is that this is easy to fix by simply choosing to reuse.

- **Reusable Bags**

Why?

- ◆ Over 1.6 billion gallons of oil are wasted each year in the U.S. in producing disposable plastic bags.
- ◆ Disposable plastic bags are a major contributor to our growing litter problem.
- ◆ Less than 1% of disposable plastic bags are recycled.
- ◆ While much better than forever in a landfill, recycling consumes energy and resources, and should be the last resort.
- ◆ The great news is that this is easy to fix by simply choosing to reuse.

What we do (cont.)

Our Services:

- **R4 Assessments (Responsible Reducing, Reusing, & Recycling)**
Why? Because you may not realize what can be easily done to save money while reducing your environmental impact.
- **Green-Sense Events™:** *Saving the planet one event at a time* by making it easy to avoid typical disposable event items, like drinkware, flatware, and silverware, and to recycle as much as possible.
Why? Because events large and small are sadly notorious for not being environmentally-friendly, but that's easier than ever to change.
- **Public Recycling Deployment:** *Making it convenient to do the right thing.*
Why? Because most consumables use materials that can be recycled, yet very few public places provide recycling collection, so things that could and should be recycled end up in the landfill...forever.
- **Rainwater Collection Systems:** *Practical solutions for conserving water.*
Why? Because using public water and wells for irrigation and other non-potable applications puts unnecessary burden on those water sources.

Who we serve

We serve all that are interested in reducing their environmental impact, including:

- Individuals & families
- Non-profit and commercial organizations
- Schools, universities, alumni & parent-teacher organizations
- Caterers and event planners
- Race organizers
- Emergency response organizations
- Government institutions
- And more...
